

1 **What Is Claimed Is**

- 2 1. A beach buggy comprising a frame, a rear wheel installed on the
3 frame, a rear engine installed on the frame and operably connected
4 with the rear wheel, a front wheel installed on frame and a front
5 engine installed on the front fork and operably connected with the
6 front wheel.
- 7 2. The beach buggy according to claim 1 including a post installed on
8 the frame and a seat installed on the post.
- 9 3. The beach buggy according to claim 1 including a rear transmission
10 for connecting the rear engine with the rear wheel.
- 11 4. The beach buggy according to claim 3 wherein the rear transmission
12 includes an axle extending across the frame, a first pinion operably
13 connected with the rear engine, a first gear installed at an end of the
14 axle, a first transmitting element for connecting the first pinion with
15 the first gear, a second pinion installed at an opposite end of the axle,
16 a second gear attached to the rear wheel and a second transmitting
17 element for connecting the second pinion with the second gear.
- 18 5. The beach buggy according to claim 4 wherein the first transmitting
19 element is a belt.
- 20 6. The beach buggy according to claim 4 wherein the first transmitting
21 element is a chain.
- 22 7. The beach buggy according to claim 4 wherein the second
23 transmitting element is a belt.
- 24 8. The beach buggy according to claim 4 wherein the second
25 transmitting element is a chain.
- 26 9. The beach buggy according to claim 1 including a front transmission

- 1 for connecting the front engine with the front wheel.
- 2 10. The beach buggy according to claim 9 wherein the front transmission
3 includes an axle extending across the frame, a first pinion operably
4 connected with the front engine, a first gear installed at an end of the
5 axle, a first transmitting element for connecting the first pinion with
6 the first gear, a second pinion installed at an opposite end of the axle,
7 a second gear attached to the front wheel and a second transmitting
8 element for connecting the second pinion with the second gear.
- 9 11. The beach buggy according to claim 9 wherein the first transmitting
10 element is a belt.
- 11 12. The beach buggy according to claim 9 wherein the first transmitting
12 element is a chain.
- 13 13. The beach buggy according to claim 9 wherein the second
14 transmitting element is a belt.
- 15 14. The beach buggy according to claim 9 wherein the second
16 transmitting element is a chain.
- 17 15. The beach buggy according to claim 1 wherein the frame includes a
18 rear fork installed thereon in order to support the rear wheel.
- 19 16. The beach buggy according to claim 1 wherein the frame includes a
20 front fork installed thereon in order to support the front wheel.
